

HOW TO CONNECT TO WI-FI

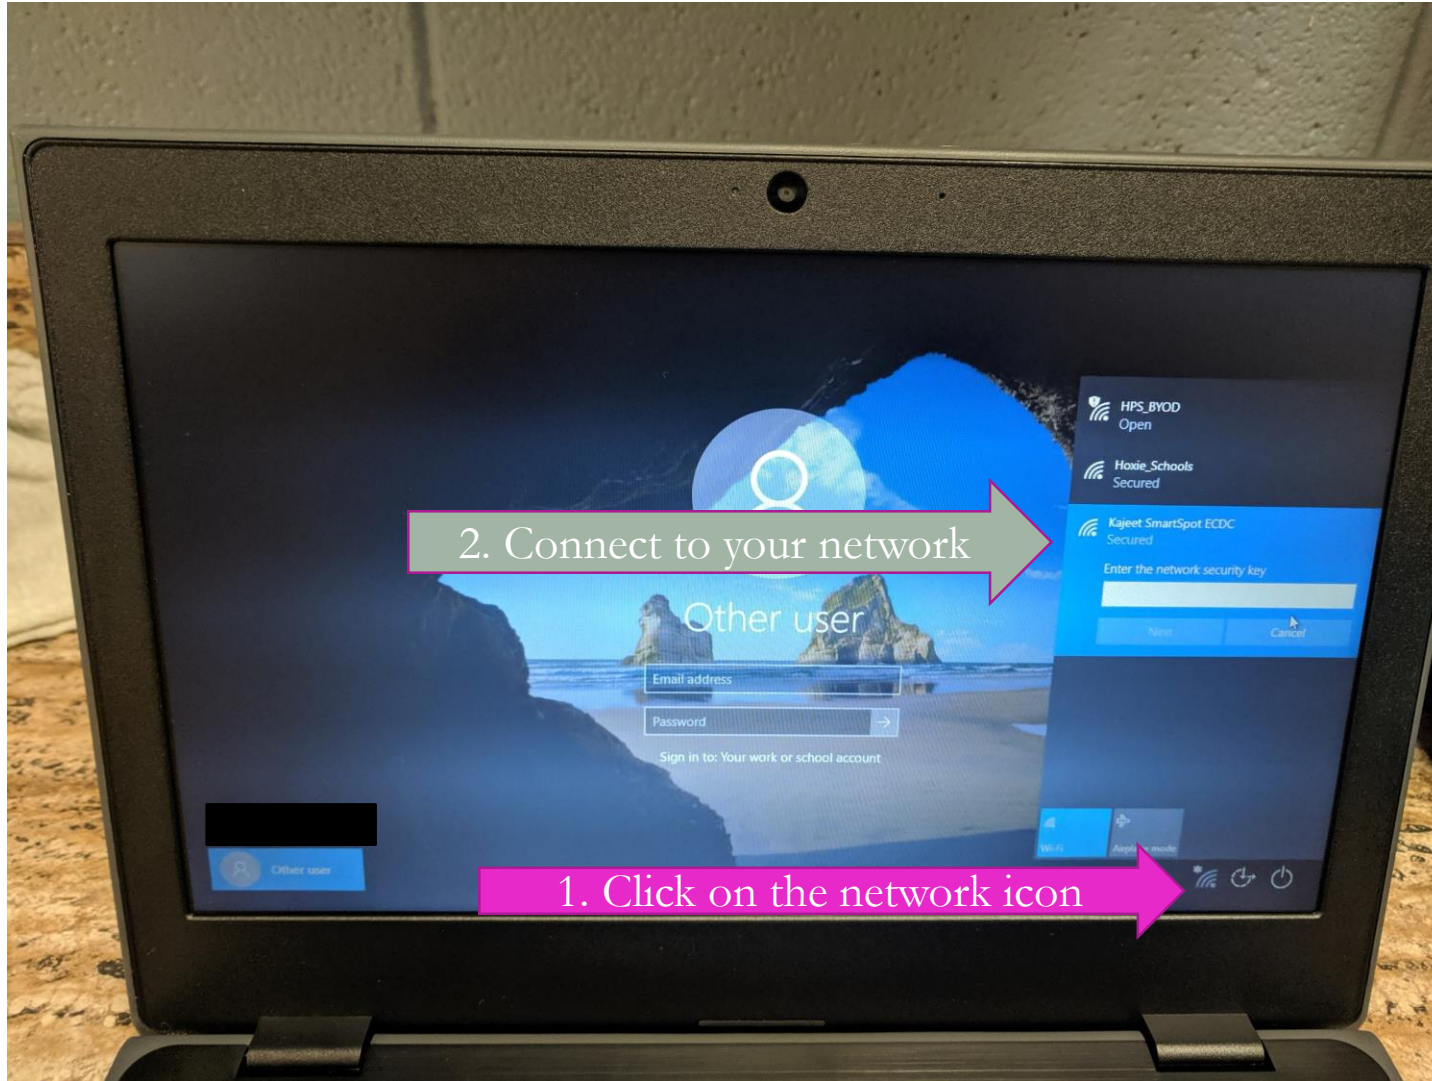

For Hoxie Online Students

Step 1

Turn on the laptop and wait for it to get to the login screen.

Fact: Our laptops will need Wi-Fi to work. So this is essential.

Step 2

1. Click on the Wi-Fi/network icon in the bottom right hand side of the screen.
2. Then choose your network and connect. If your Wi-Fi has a password, you will be prompted to enter it here. If you have a Kajeet hotspot, follow the directions in the kit for the password.

Done

Now you can log into your device.

Tip: select the remember option when adding a Wi-Fi network. This will tell the laptop to automatically connect to that network when it is available.
